

## Plan of my lunar lander

Start screen - Explanation of what's expected to complete the game, and a start button:

“Help Axel and his rocket ship to land on a new unexplored planet. But be careful, if you land too fast he will not make it.”

Game screen - A rocket ship in space with Axel in the window. And the planet underneath which you should try and land on, it might be harder to land on some places.

Result screen - If you land too quickly and too fast the result will fail, the rocket ship might even break. If you land safe and sound you have succeeded and Axel will thank you!!
